Roman Numerals to 100

Year 4 · Number · y4-roman-numerals

Name: _____ Date: _____

Class: _____ Score: _____ / _____

Instructions
Answer every question in Practice. Try the Challenge section once Practice is complete. 10 questions in total.

Practice

1. What number does the Roman numeral X represent?

2. Write the number 7 as a Roman numeral.

3. Write the number 9 as a Roman numeral.

4. What number does XXX represent?

5. L stands for 50 and C stands for 100. Which Roman numeral represents 50: L or C?

6. In Roman numerals, a smaller symbol placed before a bigger one is subtracted (IV = 5 minus 1 = 4). What number does IX represent?

7. A Roman numeral symbol is never repeated more than 3 times in a row (III is fine, but 4 is written IV, not IIII). What is the correct Roman numeral for 4?

8. Remember the four subtractive pairs to memorise: IV=4, IX=9, XL=40, XC=90. Using this, what is 90 in Roman numerals?

Challenge

1. Convert the Roman numeral XCVIII to a normal number.

2. Roman numerals only ever use one subtractive pair per number segment — never two in a row. Write 49 as a Roman numeral.
